

RoHS and REACH Statement

As a global distributor of electronic components, Component Dynamics is committed to compliance with the European Union's regulations concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) and the Restriction of Hazardous Substances (RoHS) in electrical and electronic equipment.

REACH Compliance:

REACH Regulation (EC) No 1907/2006 aims to ensure a high level of protection of human health and the environment from the risks that can be posed by chemicals. As a distributor, we confirm that: Internal verifications are completed by reviewing packaging, the physical product (including product markings) and associated documentation for signs of potential counterfeit material including:

- We do not manufacture or import substances on their own within the EU/EEA in quantities of 1 ton or more per year.
- We fulfill our obligations under REACH by communicating relevant information along the supply chain.
- We collaborate closely with our suppliers to ensure that substances of very high concern (SVHCs) are not present in concentrations above 0.1% weight by weight in the articles we supply, unless exempted.

RoHS Compliance:

RoHS Directive 2011/65/EU restricts the use of certain hazardous substances in electrical and electronic equipment placed on the EU market. We ensure compliance by:

- Verifying that our suppliers provide RoHS compliant products with restricted levels of substances including lead (Pb), mercury (Hg), cadmium (Cd), hexavalent chromium (Cr VI), polybrominated biphenyls (PBB), and polybrominated diphenyl ethers (PBDE).
- Conducting regular audits and assessments of our products and suppliers to guarantee continued adherence to RoHS requirements.
- Providing certificates of compliance upon request to demonstrate conformity with RoHS standards.
- For any further inquiries regarding our REACH and RoHS compliance or to request specific compliance documentation, please contact us at info@component-dynamics.com
